## Competencies and abilities

Solid understanding of software architecture, algorithms, best practices, functional programming and OOP principles. Analysis of technical feasibility, evaluating tradeoffs. Ability to identify and solve problems, with 8 year experience in backend, mobile and web development, using many languages and technologies. Advanced knowledge of operating systems, networking and cloud computing. Ease of working in teams and learning new technologies. Time management capabilities and ability to work under pressure.

## Work history

2013 - 2017 - Digisystem

Designed, developed and maintained many systems, for internal usage and for clients, seeking high quality, fast iterations, process automation and user satisfaction.

Technologies:

Backend: Java (REST APIs, using Spring, Hibernate, Kotlin), .NET (ASP.NET WebAPI), PHP, SQL (MySQL, PostgreSQL, SQL Server) and NoSQL (MongoDB)

Mobile: Android (Java and Kotlin)

Frontend: Javascript (Angular) and .NET (WPF)

Tools and infrastructure: Linux, Git, AWS, Docker, NewRelic

2010 - 2013 - OSUC

Developed a school management system to automate processes and help collaboration. Implemented open-source solutions for networking and telephony to reduce costs.

Technologies: LAMP stack, Java, Linux

## Projects

BusFinder - [Android app](#) to locate buses of São Paulo in real-time

## Education

Computer Programming and System Analysis - 2013, Fatec  
Telematics (Technical course) - 2009, CEAP Pedreira

## Idioms

Fluent Portuguese, advanced English and basic Spanish.

## Certifications

Oracle Java SE 8 Programmer I (Exam 1Z0-808)

Microsoft Programming in HTML5 with Javascript and CSS3 (Exam 70-480)
